

Labo n°1 : Configuration de base

-> Morgan Valentin

Schéma du labo :

Astuces connexion COM sur linux

```
sudo dmesg | grep -i tty # Permet de trouver le port
sudo screen /dev/ttyUSB0 # Permet de se connecter au port
# "ttyUSB0" => C'est mon port, le votre sera peut-être différent
```

R1

```
hostname R1
enable secret cisco
no ip domain-lookup
ip domain-name henallux.be

username admin password class
crypto key generate rsa general-keys modulus 1024
ip ssh version 2
```

int f0/1

```
description Vers S1
ip add 192.168.10.90 255.255.255.0
no shut
```

line vty 0 4

```
transport input ssh
login local
```

line console 0

```
logging synchronous
```

S1

```
hostname S1
no ip domain-lookup

int vlan1
 ip add 192.168.10.80 255.255.255.0

ip default-gateway 192.168.10.90
```

PCA

ipv4 address	192.168.10.10
